

40 YEARS OF EXPERIENCE

The different requirements for precision of repeating and fitting, dimensional stability as well as colour accuracy have led to a precise injection moulding process resulting in high quality components.

> Specialized in small/middle series production

Customers' technical requirements are taken into account during the inquiry phase, in order to offer a secure solution.

Components from 0,1 g to 6.000 g

↗ **Gas-filled internal pressure process**

↗ **Insert and outsert technology**

↗ **Silicone injection**

Processing of different thermoplastics such as:

ABS	PES	fibre re- inforced material	PA	PC	PEEK	PEI	PMMA	PPSU
PSU	silicone rubber (HTV)	TPE	many others					

For the aviation industry > thermoplastic materials in accordance to FAR 25.853 and ABD0031
