

## Drawing up of quality documents, consultation and internal audits in accordance to:

- EN 9102
- EASA 145
- EASA 21G
- EASA 21J
- Organisation and supporting of customer audits

## Analysis during component development:

- Sample parts
- Research of new materials
- Integration of new processes
- Quality investigation with internal specialists
- Quality overview with customer
- First article inspection report in acc. to AS/EN 9102

## Analysis during manufacturing:

- Production monitoring and support
- Performance of :
  - Measurement analysis
  - Visual check
  - Static test
  - Burn test in acc. to CS / FAR 25.853
  - Colour measurement
  - Roughness measurement
  - Moisture test
  - Paint adhesion test
  - Projector measurement

## Partnership with external laboratories:

- Performance of following tests and services:
  - Smoke, toxicity, heat release test
  - Static test
  - Environmental test (DO160)
  - Chemical resistance analysis
  - Fungus resistance test
  - Shaker test
  - Moisture test
  - 3D measuring
